

May 27, 2020

Dear Parents,

Thank you so much for your support this school year. I have seen many of your children make amazing strides in math thanks to your encouragement, and I look forward to an even better 2020-2021 school year!

To be best prepared for the second half of Algebra 1 when we return in August, the following prerequisite skills should be mastered by each child:

1. Order of operations
2. Solving single-variable equations and inequalities
3. Graphing and writing linear equations
4. Solving systems of linear equations and inequalities
5. Rules of exponents

This summer's math assignment can be found on the SBA website. This substantive assignment is designed to be a review of many of the skills we covered this year in the first half of Algebra and **is the first homework assignment due upon our return in August.** Additionally during the first week of school your child will take a written assessment over this material to determine his or her mastery.

Please feel free to contact me via email at apowers@stbernard.org with any questions you or your child may have. I hope you have a wonderful and safe summer!

See you on August!

Arynn Powers
