

May 2020

Dear Parents,

Thank you so much for your support this school year. I have seen many of your children make amazing strides in math thanks to your encouragement! To be best prepared for Glencoe Algebra 1 when they return in August, students should have mastery of the following prerequisite skills:

1. Find and use fraction-decimal-percent equivalents
2. Determine area, surface area, and volume of various geometric figures
3. Write & solve proportions
4. Translate words into algebraic expressions and equations

This summer's math assignment can be found on the SBA website. Please go to www.stbernard.org and select the **2020 Summer Work** under the Academics > Curriculum menu. There you will choose the "AP Math Login Instructions" pdf which contains the "ConnectED log-in instructions". After your child opens the pdf, he or she will follow the "If You Have A Username or Password" directions using the username and password that you received in my recent email. The assignment is to complete the Chapter 0 (zero) exercises. There are 13 Lessons in Ch.0 beginning on page P5 through page P46. Complete the **EVEN** numbered problems only. This is designed to be a review and includes many of the prerequisite skills for Glencoe Algebra 1. **This is the first homework assignment due upon their return in August.** Additionally, during the first week of school your child will take a written assessment to determine his or her mastery of these concepts.

Please feel free to contact me via email at mrford@stbernard.org with any questions.

I hope you have a wonderful and safe summer!

Mary Ruth Ford
